

Flowering Woods Edge

Offering eight different tree and shrub species, the Flowering Woods Edge, will add color and beauty to the edge of a forest or windbreak. This unique plant combination offers multiple spring and summer flowers that will thrive in the partial shade of a wood line.

Planting Specifications:**Included Species:**

- 1 – Pink Dogwood
- 1 – White Dogwood
- 2 – Eastern Redbud
- 1 – Sweetbay Magnolia
- 3 – Red Mollis Hybrid Azalea
- 3 – Pink Mollis Hybrid Azalea
- 7 – White Mollis Hybrid Azalea
- 5 – Blue Hydrangea

Hardiness Zone:

6-8

Sun Exposure:

Part shade

Space needed:

100' length of woods edge

Required topography:

Flat to rolling

Layout:

The Woods Edge planting is laid out, first, by spacing the five trees based on the dimensions included on the layout plan. The shrubs are then planted below the ornamental trees as shown on the layout plan.

Recommended use/Design Principal:

The Woods Edge planting offers eight different tree and shrub species which are intended to be installed along an existing wood line for added visual interest. The plant combination offers multiple spring and summer flowers which do well in the partial shade of a wood line. From the early spring bloom of the Eastern Redbud to the early summer Sweetbay Magnolia bloom the Woods Edge planting will provide seasonal flowering interest.

Shorten the proposed distance of the Woods Edge planting for a more compact planting or purchase multiple woods edge combinations in order to expand upon the designed length of the planting.

Peak Time(s):

- Spring – Pink Dogwood: pink bloom
 White Dogwood: white bloom
 Eastern Redbud: rosy pink bloom
 Red Mollis Hybrid Azalea: red bloom
 Pink Mollis Hybrid Azalea: pink bloom
 White Mollis Hybrid Azalea: white bloom
- Summer - Sweetbay Magnolia: white bloom
 Blue Hydrangea: blue bloom
- Fall - Pink Dogwood: red berries
 White Dogwood: red berries

Modifications:

Modify length of planting as needed to meet specific needs, planting length can be shortened and the plantings compacted or multiple plant combinations can be purchased for longer distances.
